For anyone who has **not ever** taken a lesson and would like to learn how to skate, please recommend the individual booster lessons to get them started. (this is because when one first learns to skate hands on instruction may be necessary. Due to our covid protocols we want to be able to provide the safest learning environment for all skaters without worrying about transferring germs from one child to another if help is needed.) Once the coach has passed that child on the beginning level criteria they can move into the Learn to Skate group classes that we are offering.
